Juniper Managed Security Services by InfoGuard –
Security around the Clock.

In order that the best possible security for your Juniper firewall and VPN solutions can be guaranteed, they must be permanently monitored, maintained and updated. Thanks to our Managed Services, this is now also possible for companies without security specialists of their own and without an expensive infrastructure.

Conceptual Stage
Together with you, we will identify and assess the existing risks. In addition, we will, on the basis of the international ISO 17799 security standard, establish the security zones, the amount and type of data to be transferred as well as the protection level needed.

24/7 Operation
Our certified Juniper operation team will configure your security systems and support you in installing them, following which they will competently and reliably monitor and maintain your firewalls and VPNs around the clock. Furthermore, we will, upon request, regularly implement the latest updates, and in the event of a hardware failure, replace the faulty device without delay.

Monitoring
Any problem which may occur will be analyzed, solved and finally documented in a clearly structured manner. In the event of an attack on your systems, our security experts will react and take appropriate measures immediately. Thus we can guarantee the full operability and availability of your systems at all times.

Reporting
All of your systems' relevant data will be processed by us and periodically placed at your disposal, providing you with the full view of your Juniper security systems and networks and allowing you to apply for configuration changes on this basis – changes that will be implemented immediately and swiftly, after being examined for possible flaws and adjusted accordingly.

Made-to-measure, efficient, Cost-conscious.
For all these services, we offer you made-to-measure support contracts or, if you prefer, inexpensive annual subscriptions – take advantage of our team of experts at reduced hourly rates! Ask our experts, they will gladly offer their advice.

InfoGuard – Your reliable Partner for secure 24/7 operation.
We employ certified specialists for establishing information security as well as experienced professionals for specifically and properly communicating it in your company. This is the first step towards integral information security.
