PRESS RELEASE

Baar / Neu-Isenburg, 14 January 2026

Cyber security expert InfoGuard joins forces in Germany: Rebranding as InfoGuard Deutschland GmbH

Following the strategic merger of Germany-based Communication Systems GmbH and Swiss company InfoGuard AG last year, cooperation between the two companies has reached another milestone: with immediate effect, InfoGuard Com-Sys GmbH will operate under the InfoGuard brand and has been renamed InfoGuard Deutschland GmbH.

Following the strategic merger of Germany-based Communication Systems GmbH and Swiss company InfoGuard AG last year, cooperation between the two companies has reached another milestone: with immediate effect, InfoGuard Com-Sys GmbH will operate under the InfoGuard brand and has been renamed InfoGuard Deutschland GmbH.

With this rebranding, InfoGuard consistently implements its One Brand approach and makes visible what employees have already been living in practice over recent months: a shared vision, the targeted use of synergies, a strong team and a unified market presence. This step symbolises the successful integration and the consolidation of comprehensive cyber security expertise under a single brand.

More performance. More security. More future.

For customers, this primarily means greater capability, enhanced security and a consistently coherent service experience. As one of the largest specialised cyber security providers in the DACH region, the company is broadly positioned with revenue of more than EUR 100 million, a comprehensive 360° cyber security portfolio from a single source, and more than 350 employees across six locations in three countries. Two state-of-the-art, fully staffed Security Operations Centres (SOC) in Germany and Switzerland ensure customers' cyber resilience around the clock, all year round.

InfoGuard consolidates its strengths for a cyber-resilient DACH region

The merger provides customers with an expanded, harmonised and future-oriented service offering, backed by extensive and long-standing experience in cyber security:

- **Holistic 360° cyber security portfolio for the entire DACH region:** Customers in Germany benefit nationwide from consolidated expertise and an expanded portfolio. This includes flexible and technologically leading Managed Detection & Response (MDR) services with in-house SOCs in Switzerland and Germany, Incident Response & CSIRT (Computer Security Incident Response Team), Managed and Cloud Security Services (MSS), as well as in-depth consulting, specialised penetration testing and red teaming.
- **Combined cyber security excellence:** Organisations benefit from 25 years of experience and the strength of one of the largest specialised cyber security providers in the DACH region.
- **Access to international resources:** The merger provides access to expert teams, standardised processes, and state-of-the-art technologies and services.
- **BSI-qualified incident response:** As a BSI-qualified service provider for APT response (Advanced Persistent Threat), handling several hundred security incidents per year, InfoGuard ensures rapid and professional incident response through one of the most experienced CSIRTs in the German-speaking region. InfoGuard cooperates with numerous cyber insurance providers.

One Vision. One Brand. One Team. – A strong leadership team for the digital future

"The merger was the most important step in our shared strategy, combining Swiss quality, German engineering expertise and an international perspective. Under the new name, we now stand visibly united with a shared vision, as one brand and one team. The past months have shown that this step represents a reliable investment in a digitally secure future for both us and our customers," explains Daniel Heinzig, Managing Director of InfoGuard Deutschland GmbH.

"With our holistic 360° cyber security services portfolio, we offer customers comprehensive protection from a single source. Service excellence is our benchmark – we support our customers as a trusted security advisor over the long term and with reliability," adds Ralf Haubrich, Chief Revenue Officer of InfoGuard Deutschland GmbH.

25 years of cyber security expertise. Cyber resilience for today and tomorrow.

Thomas Meier, CEO of InfoGuard AG, adds: "With the name change, we are consistently implementing our joint brand presence in good time for InfoGuard AG's 25th anniversary this year. In doing so, we are reinforcing our ambition to actively shape cyber resilience in the DACH region – day after day, around the clock and with local on-site presence."
