Top-500-ICT-Companies 2017

InfoGuard at no. 8 in the list of the fastest growing ICT companies in Switzerland

Every year, the Swiss magazine Computerworld publishes the turnover data of the top 500 Swiss IT companies, together with their development in different categories. As in the previous years, in 2017 again InfoGuard has positioned itself as a riser in several fields, and proved its worth in front of renowned companies.

InfoGuard was listed in the top rankings in three categories. In the **"Top 10: Swiss ICT companies by growth of turnover"** InfoGuard reached the 8th place, with a turnover of 25m CHF in 2016. The increase since 2007 is 333.3%; with this result, InfoGuard plays in the same top class as Apple, Google and Coop. InfoGuard entered also the **"Top 10: Security"** list at no. 10, an increase of two position from the previous year. And in the general ranking of the **"500 strongest revenue-making ICT companies in Switzerland"**, InfoGuard stepped 16 positions up, and is currently listed at no. 248.

Thomas Meier, InfoGuard's CEO, is pleased with the positive development: "We look back at an extremely successful business year, in which we managed to improve our position in the Swiss cyber security marketplace. And I am very proud that we achieved a better result, not just in the general ranking, but also with respect to competitors in the security branch". Meier expects a further growth in the future, which is to be ascribed to the increase in cyber security incidents, but also to the stronger awareness of top managements and boards with respect to cyber security. Moreover, said Meier to Computerworld, InfoGuard's comprehensive services in consulting, auditing, cyber defence, security and network solutions, are highly appreciated by clients,
