Baar, 16 June 2026

InfoGuard expands Board of Directors with cyber security expert Frank Brandenburg

InfoGuard AG is expanding its Board of Directors: Frank Brandenburg will be joining the body as a new member. With his many years of international experience in the fields of cyber security, market strategy and corporate development, he will strengthen InfoGuard's strategic direction and support further expansion in the DACH region.

Frank Brandenburg has extensive management and market experience in the cyber security industry. In various leadership roles, he has supported renowned companies such as Infigate, NTT Security, Websense, Clearswift and McAfee in building market positions, implementing growth strategies and developing sustainable security and service organisations. His in-depth knowledge of the German market in particular, as well as his strategic perspective, will specifically support the further expansion of InfoGuard's activities in Germany, Austria and Switzerland.

"With Frank Brandenburg, we are gaining a personality with pronounced market knowledge, strategic foresight and many years of experience in cyber security. His expertise will be of great value for our further development and the strengthening of our position in the DACH region," says Peter Letter, Chairman of the Board of Directors of InfoGuard AG.

Frank Brandenburg is also looking forward to his new role: "In recent years, InfoGuard has established itself as a highly specialised cyber security partner with strong technical expertise and a clear customer focus. I am looking forward to actively helping to shape the further development of the company and its expansion in the DACH region."

The expansion of the Board of Directors comes at a time of targeted investments and further expansion of InfoGuard's presence in Germany. Following the acquisition of the German company Communication Systems GmbH last year and its integration and renaming as InfoGuard Deutschland GmbH at the beginning of 2026, the company has systematically strengthened its position in the German market.

Another milestone was the recent commissioning of the expanded Cyber Defence Center in Neu-Isenburg near Frankfurt. By expanding the local Security Operations Center, InfoGuard is strengthening its operational capabilities and making targeted investments in scalable cyber defence and SOC services for customers throughout the DACH region.

With the appointment of Frank Brandenburg, InfoGuard underlines its long-term growth trajectory and strategic evolution as one of the leading specialised cyber security providers in the DACH region.
