

PRESS RELEASE

Baar/Zug, 07.09.2022

ISG honours InfoGuard as a Swiss Leader & Rising Star for Cyber Security Services

InfoGuard, the Swiss expert for cyber security, has achieved no less than three top positions in the current edition of the ISG Provider Lens™ “Cybersecurity – Solutions and Services” Report 2022. InfoGuard has been recognised as the leading provider of strategic security services and technical security services, as well as being ranked as a “Rising Star” for managed security services in Switzerland.

According to prominent studies, cyber risks are among the most significant operational risks for companies. The reality is that cyber-attacks on Swiss companies are continuing to rise. They are not only becoming more numerous, but also more sophisticated and increasingly more professional in terms of quality. The challenges facing CIOs and CISOs are not lessening – quite the opposite, in fact. At the same time, in the labour market qualified staff are in short supply. This is causing a sharp increase in demand for managed security services. This is also confirmed by the authors of the current study entitled “ISG Provider Lens™: Cybersecurity – Solutions & Services”.

ISG Provider Lens™ “Cybersecurity – Solutions & Services” Report for Switzerland

In its latest Provider Lens study on “Cybersecurity – Solutions & Services”, the international technology research and consulting company Information Services Group (ISG) compares leading providers in Switzerland. Their criteria include market relevance, breadth and depth of the portfolio, strategy and vision, as well as the degree of innovation. The authors have ranked InfoGuard as Switzerland’s leading provider of “Strategic Security Services” and “Technical Security Services”. ISG particularly underlines the comprehensive portfolio and the strong market presence, as well as the large customer base. The study also recognises customer proximity and the company’s own Security Operations Center in Switzerland as additional positive points.

Distinction as a Rising Star for Managed Security Services

InfoGuard has been named a Rising Star in the “Managed Security Services” sector. “InfoGuard is the ‘Rising Star’ in managed security services in Switzerland”, states Frank Heuer, Lead Author ISG in the 2022 Report. This award highlights InfoGuard’s comprehensive service portfolio as well as the requisite market experience, including the necessary roadmap with adequate alignment to the important market trends and customer requirements. ISG also emphasises that the Zug-based cyber security expert has an excellent understanding of the local market. The “Rising Star” rating is only awarded to suppliers and service providers who have made enormous progress in the last twelve months towards achieving their goals and who, because of their above-average impact and innovative strength, are well on the way to becoming one of the top providers.

Planned growth in the Cyber Defence and Managed Security Services sector

InfoGuard AG is very proud of these awards and is continuing to pursue its successful growth trajectory in Switzerland, Germany and Austria. The strong increase in demand for cyber defence and managed security services has prompted the Swiss company to build a brand new Cyber Defence Center (CDC), which is over double the size of its predecessor at over 550m2, and opened in early September 2022. There are currently over 70 specialists working at the CDC in Baar.
