

## **PRESS RELEASE**

Baar, 07.04.2022

### **InfoGuard is a new official member of FIRST**

**InfoGuard is officially recognised as a member of the world-renowned organisation FIRST (Global Forum of Incident Response and Security Teams).**

In late March, the Swiss cyber security expert InfoGuard was accredited as an official member of FIRST, the acronym of the Global Forum of Incident Response and Security Teams. The non-profit organisation is a global network of incident response experts coming from companies as well as educational organisations and public institutions. It aims to promote cooperation, coordination and the sharing of information in order to be able to respond more quickly and more efficiently to cyber-security incidents. FIRST currently has 615 members in 99 countries.

Admission to FIRST is granted according to strict criteria, which require a review of at least two existing FIRST members. The successful accreditation confirms the high quality standards of the InfoGuard Cyber Defence and Incident Response Services, which are provided 24/7 from the Baar-based Cyber Defence Center.

“We are very pleased to become a FIRST member. As a leading Swiss provider of cyber defence and incident response services, we are confident that we can make a valuable contribution to the community as well as benefitting from other teams’ experiences,” says Ernesto Hartmann, Chief Cyber Defence Officer at InfoGuard.
