## PRESS RELEASE

Baar/Zug, 12.09.2022

InfoGuard opens its new Cyber Defence Center and doubles the surface area of its office space

As a result of its successful business growth, InfoGuard AG has recently celebrated the opening of its new Cyber Defence Center (CDC) and the large-scale expansion of its office space in Baar/Zug, following a construction period of just under three months. Around 150 guests attended the grand on-site opening party and were given an insight into the company's new centrepiece. The leading Swiss cyber security specialist is setting another milestone by doubling its office space alongside the brand new, state-of-the-art, 550m^2 CDC.

For several years, InfoGuard has been providing comprehensive managed detection and incident response services from its ISO/IEC 27001 certified, ISAE 3000 Type 2 certified Cyber Defence Center (CDC) in Baar. As well as this, InfoGuard operates its own Operations Center, which covers the entire spectrum from support and the operation of technical infrastructures to outsourced cloud services and managed security services. The experts are dealing around the clock with the security of numerous Swiss clients, as well as prestigious companies in Germany and Austria.

State-of-the-art, twice as big Cyber Defence Center
The sharp rise in demand for these services and the associated increase in staffing prompted the Baar-based company to build a brand new Cyber Defence Center, more than twice the size of its predecessor at over 550m^2. Currently, there are over 70 specialists working in the InfoGuard CDC.

Swiss Cyber Security covering more than 2,800m²

The available office space was almost doubled by moving into the neighbouring building, also on Lindenstrasse and on the same floor. InfoGuard's modern offices now cover an area of over 2,800m². They are now entered via the new "Skylounge" terrace. The centerpiece – in addition to the new CDC – is undoubtedly the spacious customer and meeting zone with its integrated "CyBar". This has now been inaugurated with clients and partners at the celebratory office opening party.

Ongoing growth of Cyber Defence & Managed Security Services

Ernesto Hartmann, our Chief Cyber Defence Officer, is extremely pleased and proud of the result. "The new CDC ushers in a new era and we are pursuing continued growth in the areas of cyber defence and managed security services. We will be continuing to systematically expand these areas". Thomas Meier, InfoGuard's CEO, adds: "The spacious office extension and especially the new infrastructure mean that we are able to provide even better protection for clients with our CDC services. This milestone makes a targeted investment in the future and in continued growth. It is very important for us to continue to sustainably boost the Baar location and our excellent corporate culture. I am already looking forward to more excellent events with our clients, partners and employees at our Baar site".
